Summary

BSc IT graduate from Mumbai University who builds mobile and web applications end-to-end — from UI in Flutter to backend logic in Python and Node.js/Express, with MongoDB and Firebase handling data and real-time sync. Currently pursuing an MCA in AI/ML at Amity University alongside a Data Science and Deep Learning program through Daksh Gurukul, IIT Guwahati, strengthening data analysis skills with Pandas and NumPy. Interested in applying data science, automation, and robotics to real-world problems.

Technical Skills

- **Languages:** Python, Dart, JavaScript
- **Mobile Development:** Flutter
- **Backend Development:** Node.js, Express.js, REST APIs
- **Databases:** MongoDB (MongoDB Atlas), Firebase

Experience

Flutter Developer — Self-Initiated Project

Jan 2025 – Mar 2025

Remote

Mumbai, India

- Designed and built a Student Management App using Flutter for the frontend and MongoDB Atlas for real-time data storage.
- Implemented core modules for student profiles, attendance tracking, and assignment management.
- Structured the app's data layer around MongoDB Atlas to support real-time updates across student records.

Projects

Student Management App

Flutter, Dart, MongoDB Atlas

- Built a mobile application for managing student profiles, attendance, and assignments with real-time data sync.
- Modeled the data layer in MongoDB Atlas to support real-time updates across connected student records.

Chess Game

Python

- Implemented a chess game in Python, including board representation and move validation logic.
- Built as an independent exercise to strengthen core programming and algorithmic thinking.
