## Summary

Python and web developer who builds full-stack web applications, client websites, and Python desktop software. Delivered three live client websites, including a React and PHP e-commerce store, plus personal projects such as a Pygame chess game with a Minimax AI. Pursuing an MCA (AI/ML) at Amity University and a Data Science and Deep Learning program through Daksh Gurukul, IIT Guwahati.

## Technical Skills

- **Languages:** Python, JavaScript, PHP, Dart, HTML, CSS
- **Frameworks & Libraries:** React, Vite, Flutter, Node.js, Express.js, Pandas, NumPy, Pygame
- **Databases & APIs:** MongoDB, Firebase, REST APIs
- **Tools & Platforms:** Git, GitHub Pages, WordPress

## Experience

**Freelance Web Developer** *Client Projects*

**The Nature Choice — E-commerce Website** Live Site
*React, PHP, REST API, Context API*

- Built a full-stack e-commerce website for dry fruits and herbal products using a React frontend and a PHP backend.
- Implemented a user account page backed by a `PUT /api/auth/me` PHP endpoint with React Context API, and fixed mobile layout and page-crash bugs.

**Shobha MFG & Eng — CNC Manufacturing Website** Live Site
*WordPress, HTML, CSS, JavaScript*

- Developed a multi-page business website for a CNC machining company, with a filterable tools and components catalogue and a quote-request contact page.

**Sowaka Access — Healthcare Landing Page** Live Site
*Web Development*

- Built and launched a landing page for a regulatory-compliant medicine access company serving patient access and clinical trial supply programs in India.

## Projects

**Chess Game** GitHub
*Python, Pygame*

- Built a chess game with two-player and player-vs-computer modes, implementing castling, en passant, pawn promotion, and check, checkmate, stalemate and draw-rule detection.
- Developed a three-level AI; the hard level uses Minimax with alpha-beta pruning (depth 3) and piece-square tables. Added undo, JSON save/load, timers, and board themes.

**ColdReach Studio — Cold Message & Email Generator** GitHub Live Demo
*React, Vite, JavaScript*

- Built a React web app that generates outreach messages for WhatsApp, LinkedIn, and Email from 12 editable templates, with dynamic input forms and a live preview with character counter.
- Structured each template as an isolated data module for easy editing, and deployed the app on GitHub Pages.

**Rocky Desktop Pet (inspired by *Project Hail Mary*)** GitHub
*Python, Pillow, OpenCV, NumPy, pywin32*

- Built an animated Windows desktop companion with idle, dance, movie, roaming, and sleep states, drag-to-move, adjustable size, and a right-click menu.
- Used the Windows API to detect music and video playing in open windows and switch animations automatically.

## Education & Certifications

**Amity University, Noida** — MCA, AI/ML Jul 2025 – Jun 2027
**Daksh Gurukul, IIT Guwahati** — Data Science and Deep Learning Program Jan 2025 – Mar 2026
**Mumbai University (K.P.B. Hinduja College)** — BSc Information Technology Jun 2022 – Jul 2025
**Certification:** Data Analyst Certification
